PRO7 Quick Start

Dear users:

When you get this powerful product, please do the operations as following.

PRO7 Tablet

Step 1

Connect the VCI to your car OBD interface.

You can find the light will flash (it shows the Connection is good), then it comes into standby and waiting for working. Usually the OBD interface is under the steering wheel (above the brake), some are hidden in the tool box of the hand brake, you can reference the following picture to find it.

Step 2

On the tablet, click **Settings** – **Bluetooth** and turn on the Bluetooth.

Step 3

Scan the Bluetooth, choose your S/N ID and put the password 0000

or 1234. Then, click OK.

Two Bluetooth information might be displayed. You need to try to connect both Bluetooth until your pair with it successfully.

Step 4

Find the app in PRO Tablet, and register your product.

Step 5

Then you can choose the special function or the brand of your car

to perform functions.

Step 6

Find the brand of your car in Diagnostic function as following, and enjoy the service that our products bring to you.

The following shows an example of FIAT:

How to download diagnostic software?

Before you perform functions, corresponding diagnostic software

must be downloaded.

There are two ways to download the diagnostic software:

1. Click **Diagnostic**, select a car brand and download corresponding version directly.
